

POLICY MANAGEMENT SUITE

TAKE YOUR BSS EASY

Components

Policy and Charging Rule Function (PCRF)

Service provider class system for managing the subscriber's individual and group Internet access policies in the operator's networks

Subscriber Profile Repository (SPR)

Subscriber data storage of the telecom operator's Policy and Charging Control framework

Diameter Routing Agent (DRA)

Scalable tool for Diameter message distribution and routing for various signaling flows of the CSP networks

Benefits

- **CAPEX Reduction**

The Suite is built on top of open source software frameworks. No additional CAPEX for 3rd-party software

- **Horizontal Scalability**

Easy horizontal scaling by adding processing nodes to support increased loads. Policy Management Suite is ready for installation on commodity hardware

- **Ease of Policy Administration**

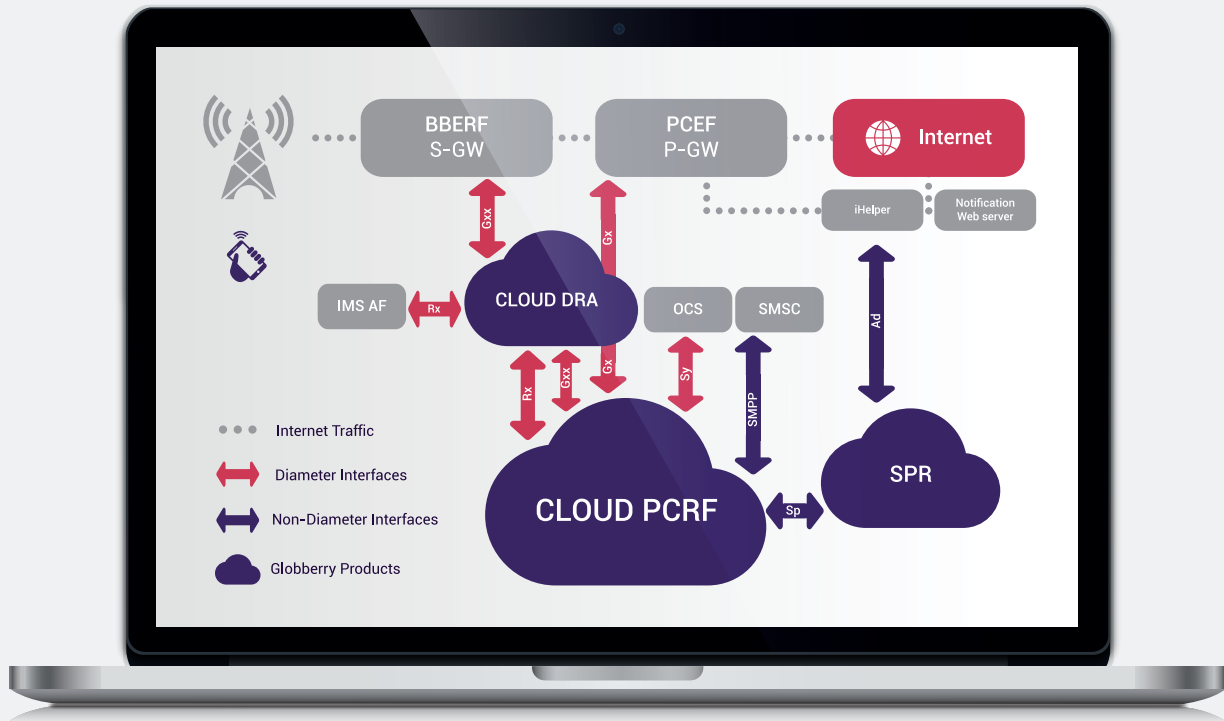

Simple management UI for creation of policy rules and signaling flows, allowing shorter time to market new products

- **Cloud Ready**

Policy Management Suite products are built based on microservice architecture and are ready for deployment in hybrid cloud

Start launching new products faster

Globberry Policy management suite is pre integrated, quick to deploy and easy to manage. You will be able to configure new products way faster and respond to competition by supporting innovative business models: bill shock prevention, sponsored data offerings, QoS and bandwidth shaping, MVNO dedicated policies and many more.

Our supplementary services

- **Consulting**
Evaluation of existing policy management solution and help with definition of architecture of PCC framework.
- **Implementation**
Full cycle implementation from solution design to user acceptance testing. Integration and data migration services.
- **Support**
Operations and maintenance, 24/7 shift support, second level and product support.

About us

Globberry company is an international system integrator operating on the markets of Eastern Europe and Central Asia. Our clients are major telecom groups operating in the region such as Vodafone, MTS, Beeline and Tele2. We belong to the smaller system integrators type, hence, we provide our clients with personalized approach, friendly treatment, transparent approach and affordable, flexible pricing.
